Ideation Phase
Define the Problem Statements

Date	31 January 2026
Team ID	
Project Name	EV Market Perfor Global Fuel Prices & Taxation (2020-2026)
Maximum Marks	2 Marks

Customer Problem Statement Template:

Create a problem statement to understand your customer's point of view. The Customer Problem Statement template helps you focus on what matters to create experiences people will love.

A well-articulated customer problem statement allows you and your team to find the ideal solution for the challenges your customers face. Throughout the process, you'll also be able to empathize with your customers, which helps you better understand how they perceive your product or service.

I am	Describe customer with 3-4 key characteristics - *who are they?*	Describe the customer and their attributes here
I'm trying to	*List their outcome or "job" the care about - what are they trying to achieve?*	List the thing they are trying to achieve here
but	Describe what problems or barriers stand in the way – *what bothers them most?*	Describe the problems or barriers that get in the way here
because	Enter the "root cause" of why the problem or barrier exists – *what needs to be solved?*	Describe the reason the problems or barriers exist
which makes me feel	Describe the emotions from the customer's point of view – *how does it impact them emotionally?*	Describe the emotions the result from experiencing the problems or barriers

Example:

Problem Statement (PS)	I am (Customer)	I'm trying to	But	Because	Which makes me feel
PS-1	A fuel-market researcher comparing international prices.	Compare petrol, diesel, and LPG prices across countries and regions and review changes from 2020 to 2026.	Fuel-price differences are difficult to identify quickly across many countries and dates.	Country, region, date, and fuel-type data can be difficult to interpret in raw tables without visual comparisons.	Unsure which regional patterns and changes deserve closer attention.
PS-2	An energy-policy analyst reviewing taxation and subsidies.	Compare tax percentages between countries and explore how taxation relates to petrol prices.	It takes time to compare tax levels and fuel prices and identify countries for further review.	Tax and price measures need to be viewed together; manual comparisons across many records can be slow and error-prone.	Concerned that important patterns may be missed or comparisons may be incomplete.
PS-3	A student, journalist, or informed consumer researching fuel affordability.	Understand fuel-price trends over time and compare prices by region and income level.	It can be difficult to explain changes and differences clearly using a large dataset alone.	Without maps, timelines, sorted charts, and filters, the dataset can be overwhelming to interpret.	Less confident explaining the findings clearly to others.
