Business Question and Visualization Report

Date	27 October 2026
Team ID	
Project Name	Global Fuel Prices & Taxation (2020–2026)
Maximum Marks	5 Marks

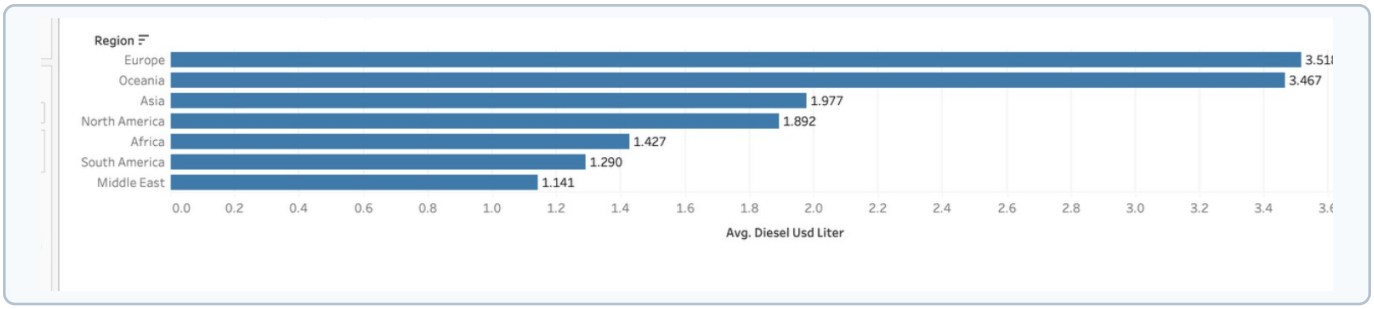

This Tableau project explores how petrol, diesel, and LPG prices vary across regions, countries, and income levels, and how observed prices relate to fuel taxation over 2020–2026. The dataset includes country, region, income level, subsidy level, date, Brent crude price, fuel prices, and tax percentage.

Business Questions and Visualisation

1. Which regions show the highest average diesel prices?

Visualization: Horizontal bar chart comparing average diesel price across regions.

Purpose: Identify regional differences in diesel prices in the dataset.

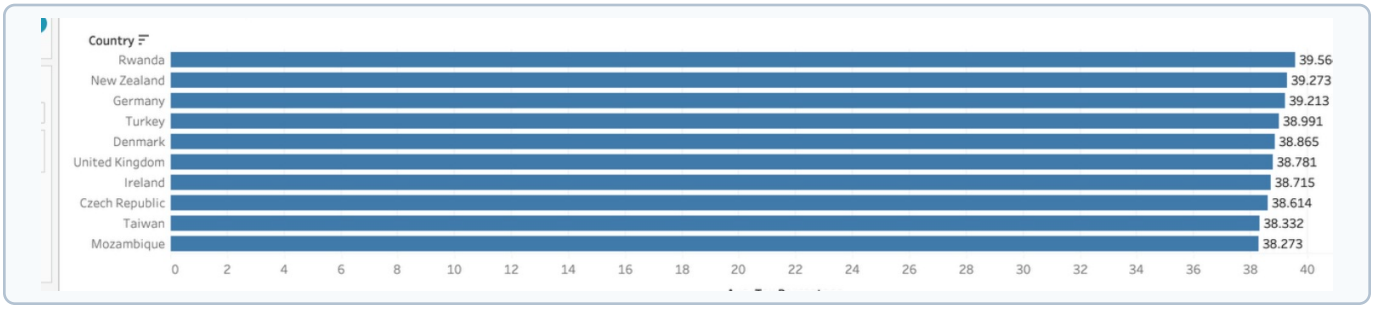

Actual Tableau worksheet screenshot

2. How does fuel taxation vary between countries?

Visualization: Horizontal bar chart ranking countries by average tax percentage.

Purpose: Compare the recorded tax percentages across selected countries.

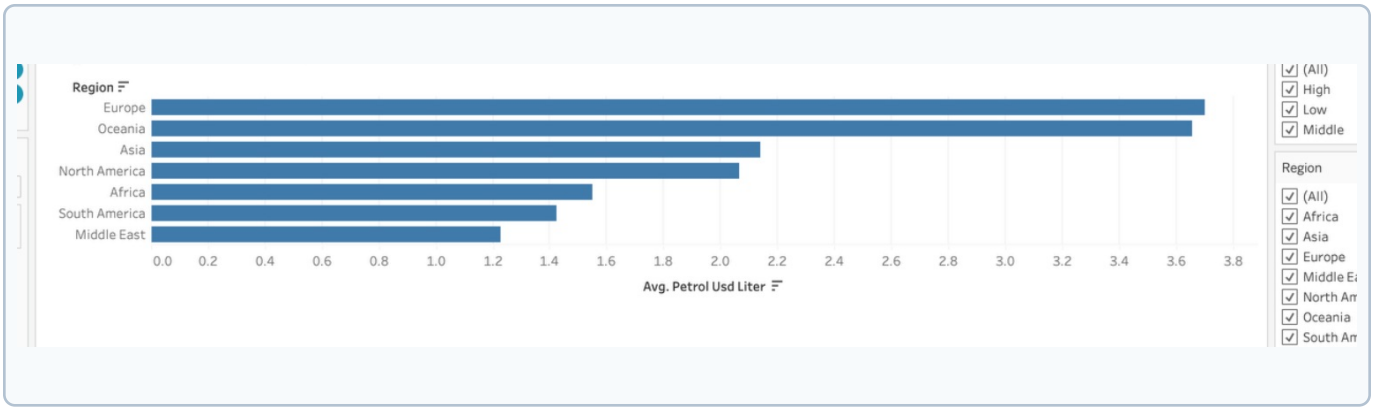

Actual Tableau worksheet screenshot

3. Which regions have the highest average petrol prices?

Visualization: Horizontal bar chart comparing average petrol price by region, with Region and Income Level filters.

Purpose: Compare regional petrol-price levels and explore the effect of the available filters.

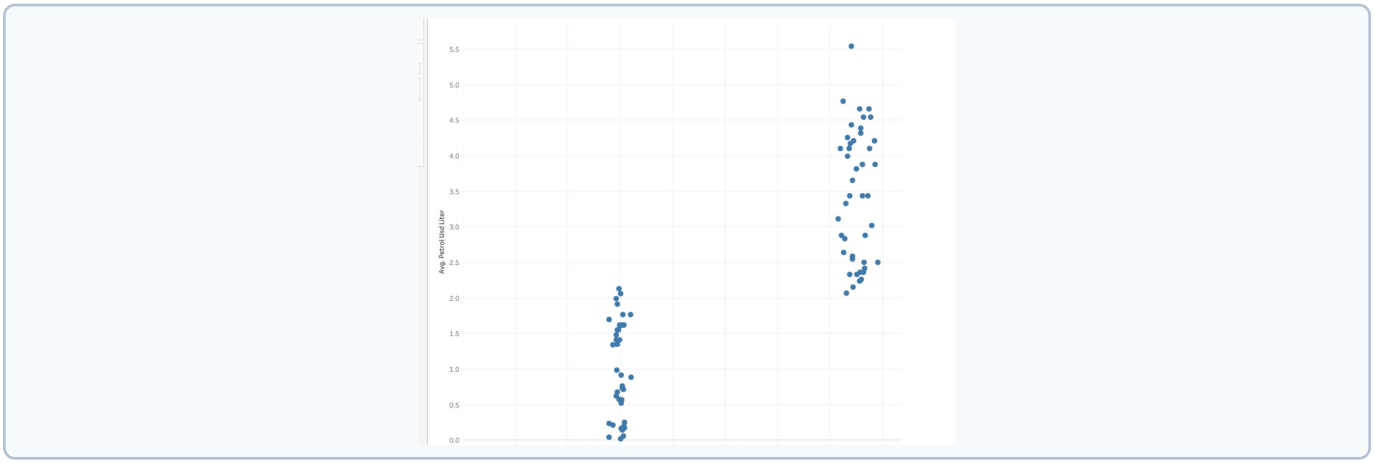

Actual Tableau worksheet screenshot

4. Is there an association between tax percentage and petrol price?

Visualization: Scatter plot with average tax percentage on the x-axis and average petrol price on the y-axis; each mark represents a country.

Purpose: Explore the relationship without assuming that taxation alone causes price differences.

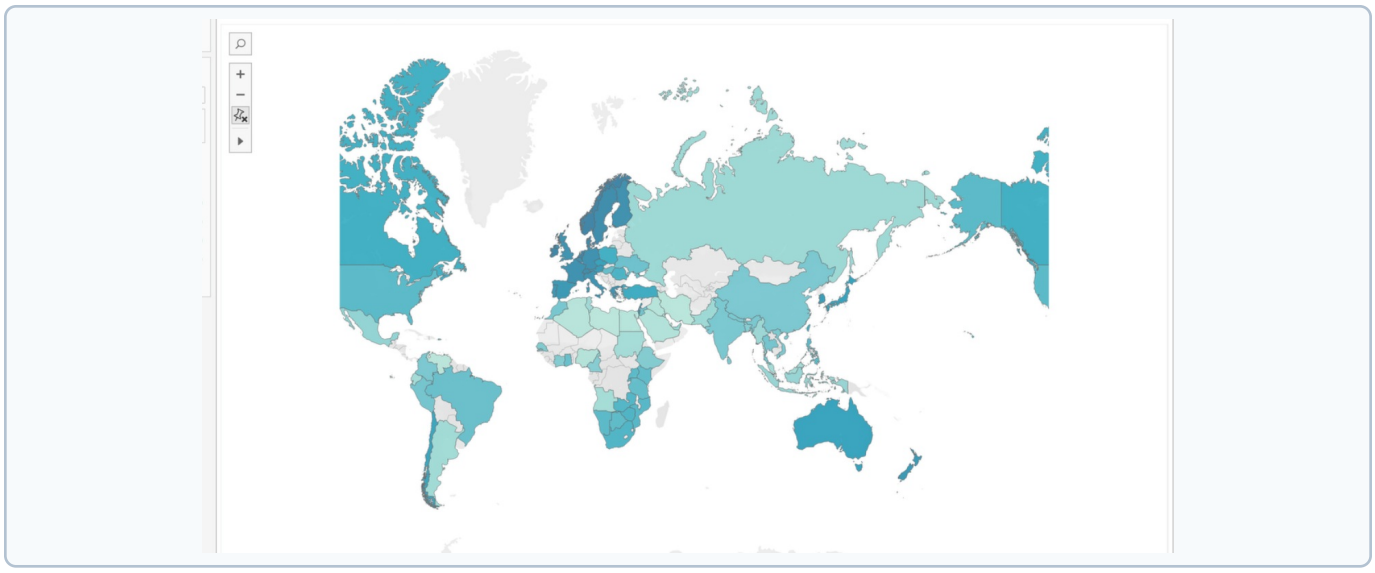

Actual Tableau worksheet screenshot

5. How are petrol prices distributed across countries worldwide?

Visualization: World map shaded by average petrol price.

Purpose: Show the geographic distribution of recorded petrol prices; unshaded areas may reflect missing or unrecognised data.

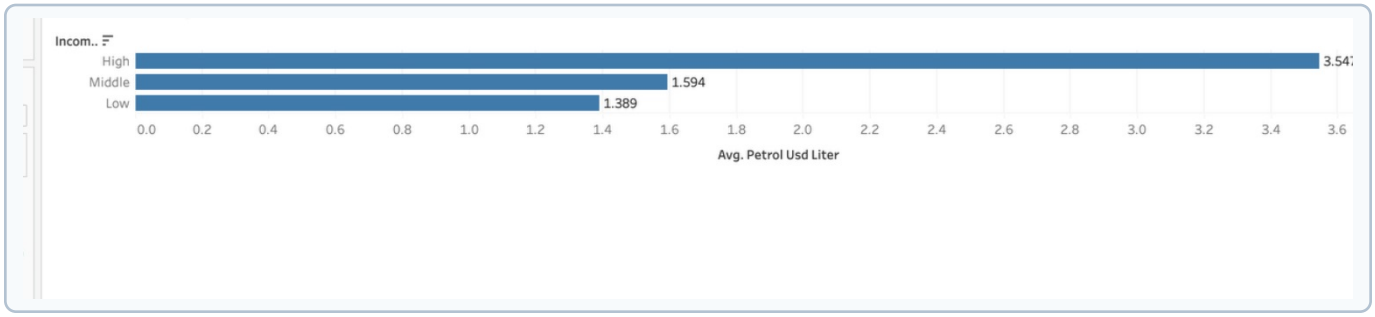

Actual Tableau worksheet screenshot

6. How does average petrol price differ by income level?

Visualization: Horizontal bar chart comparing average petrol price across High, Middle, and Low income categories.

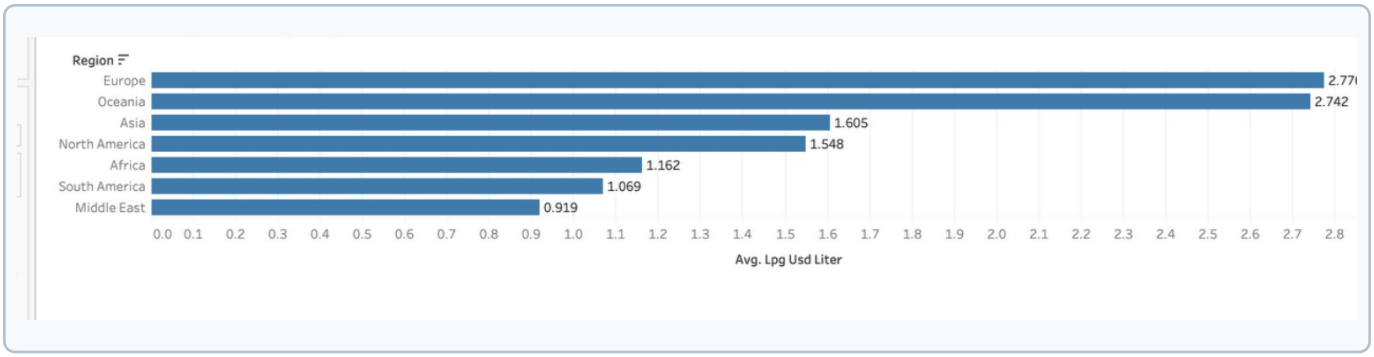

Purpose: Compare the three income-level groups represented in the dataset.

Actual Tableau worksheet screenshot

7. Which regions have the highest average LPG prices?

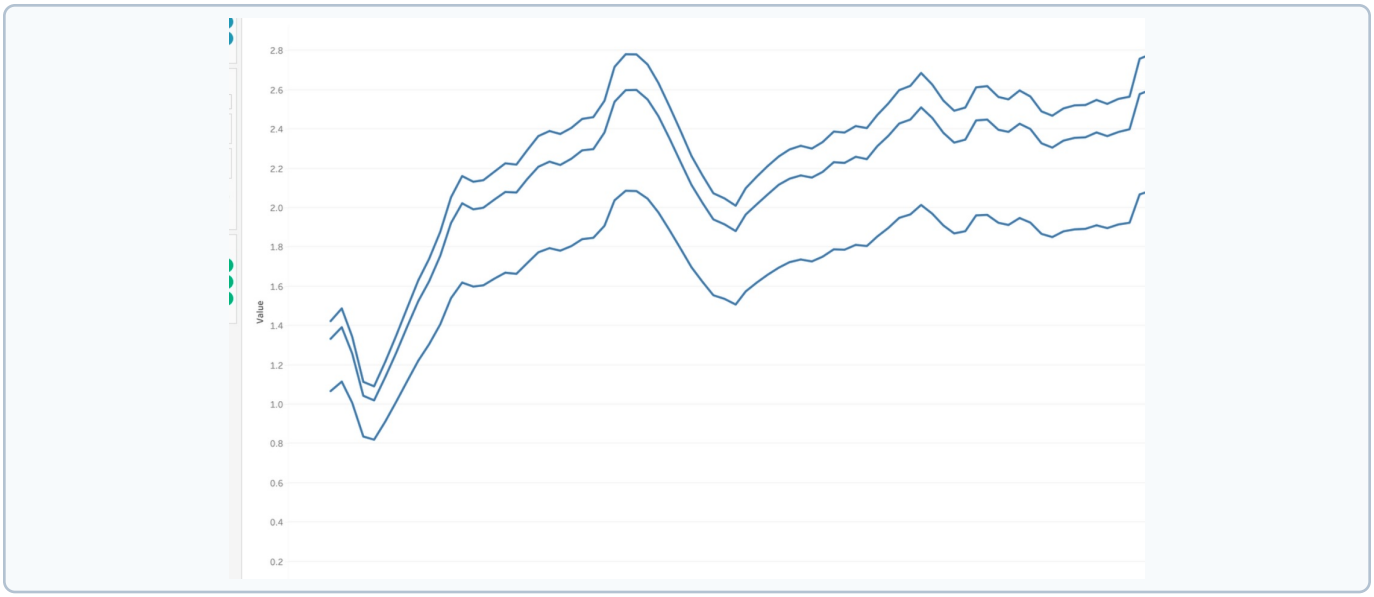

Visualization: Horizontal bar chart comparing average LPG price across regions.
Purpose: Identify regional differences in LPG prices using the same unit shown in Tableau.

Actual Tableau worksheet screenshot

8. How have fuel prices changed from 2020 to 2026?

Visualization: Multi-line time-series chart showing average diesel, LPG, and petrol prices by month.
Purpose: Compare trends over time and identify visible rises, falls, and turning points.

Actual Tableau worksheet screenshot

Note: Findings are descriptive of the dataset and do not establish causation. Values and labels shown in the charts are reproduced from the supplied Tableau screenshots.
