Story

Date	27 October 2026
Team ID	—
Project Name	Global Fuel Prices & Taxation (2020–2026)
Maximum Marks	5 Marks

Tableau stories help communicate data insights through a sequence of visualizations and captions. This project uses fuel-price, taxation, regional, and income-level views to guide viewers through a structured comparison of global fuel markets.

The story brings together the dashboard and supporting worksheets to explore how petrol, diesel, and LPG prices differ across regions, how prices changed from 2020 to 2026, and how fuel taxation varies between countries. Filters allow viewers to focus on selected regions and income groups.

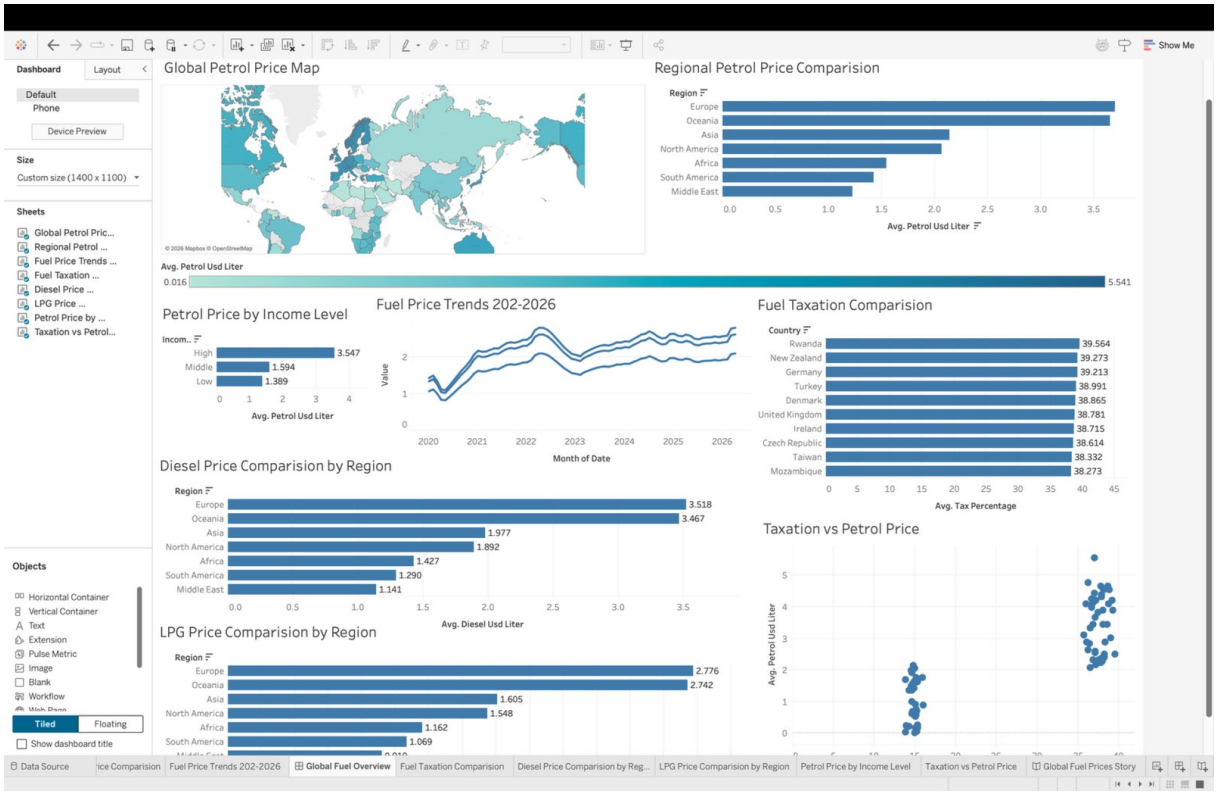

Figure 1. Global Fuel Overview dashboard showing the petrol-price map, regional comparison, fuel-price trends, income-level comparison, taxation comparison, and tax-versus-petrol scatter plot.

Observations

- **Story Point 1 – Regional Petrol Prices:** Europe and Oceania show the highest average petrol prices in the regional comparison, while the Middle East is lowest among the displayed regions.
- **Story Point 2 – Fuel Price Trends (2020–2026):** Prices fall in 2020, rise sharply into 2022, decline around 2023, and then recover through 2024–2026.
- **Story Point 3 – Fuel Taxation:** The displayed country comparison places Rwanda, New Zealand, Germany, Turkey, and Denmark among the highest average tax-percentage values in this view.
- **Story Point 4 – Diesel Prices by Region:** Europe and Oceania have the highest average diesel-price values in the regional comparison; the Middle East is lowest.
- **Story Point 5 – LPG Prices by Region:** Europe and Oceania lead the average LPG-price comparison, while the Middle East has the lowest displayed regional value.
- **Story Point 6 – Income Level and Tax–Price Relationship:** The high-income group has the highest average petrol price in the income-level chart. The scatter plot shows distinct clusters of tax percentages and petrol prices, but does not by itself establish causation.

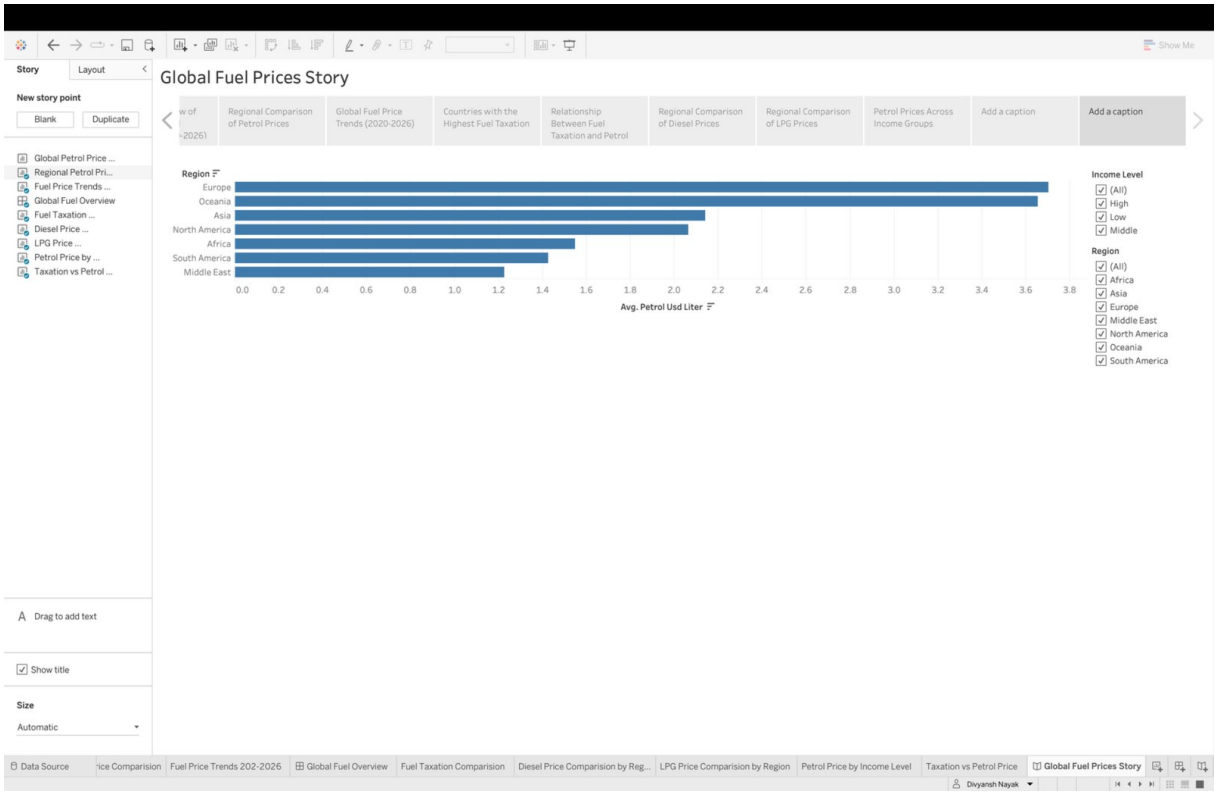

Figure 2. Tableau Story view showing the regional petrol-price comparison with Region and Income Level filters.
