Project Development Phase
Performance Test

Date	10 February 2026
Team ID	Not provided
Project Name	Global Fuel Prices & Taxation (2020–2026)
Maximum Marks	Not specified

Project Performance Testing:

The following table documents the Tableau performance and visual evidence for the Global Fuel Prices & Taxation project.

S.No.	Parameter	Screenshot / Values
1.	Data Rendered	Excel (.xlsx) source connected to Tableau Desktop. Fields include Country, Date, Region, Income Level, Subsidy Level, Brent Crude, Diesel, LPG, Petrol and Tax Percentage. 
2.	Data Preprocessing	No separate preprocessing pipeline is documented. Visualizations use the available fields with AVG aggregation for fuel-price comparisons.
3.	Utilization of Filters	The Global Fuel Overview dashboard provides Region and Income Level filters for interactive comparison. 

4.	Calculation fields Used	No custom calculated fields are confirmed. Existing measures include Petrol, Diesel, LPG, Brent Crude and Tax Percentage; AVG is used in comparison charts. 
5.	Dashboard design	Global Fuel Overview combines a world petrol-price map, regional comparisons, fuel-price trends, taxation, income-level analysis and a taxation-versus-petrol scatter plot. 
6.	Story Design	Global Fuel Prices Story presents regional petrol prices, fuel-price trends, high-tax countries, taxation relationships, diesel and LPG comparisons, and income-group comparisons.
